

urbanspec H-Series External Storage Buildings

H-Series External Storage Buildings house equipment and materials in tough, steel frame structures, configurable for footprint, layout enclosure type and access door positions. Options for architectural finishes, roof type, access control and security specifications can be specified from the same proven design platform.

urbanspec integrated design and engineering extends to security specifications accommodated within the proven steel door and frame manufacture. H-Series External Storage Buildings can be factory ordered to Secure By Design specification, certified to Sold Secure S314 Silver Specification for Security Cabinets.

urbanspec products are UK manufactured in accordance with BS EN 1090, ISO9001 and ISO14001 accredited processes and our steel frame

finishes can be selected as hot-dip galvanised or colour powder coated with external panel types from timber or steel including laser-cut design patterns.

The urbanspec H-Series roof design has been developed to accommodate the structure for both extensive and intensive lightweight green roof systems with the complete system for waterproofing, water reservoir and growing medium integrated.

Specifying urbanspec H-Series External Storage Buildings is made easy with clear technical product information for configurations and options, while site-wide coordination of outdoor storage units and street furniture is possible with a library of CAD models available for download.

Customise

A wide range of cladding options are available to select according to site use, architectural style and surrounding environment

Multiple Door Locations

Are possible within the design format along with 3 door widths

Green Roof

This option not only adds visual appeal but also benefits the environment by supporting biodiversity and promoting natural habitats for birds and insects.

Pre-Engineered

Available with 65 different pre-engineered units
