

R-Series

External Lockers

Unit shown is RT External Locker
- Firenze Anthracite Grey Cladding - Sliding Door

urbanspec R-Series External Lockers offer versatile, compact storage in easy to specify design formats. Secure external storage of household items on many residential developments is a key element of the street scene and the low-profile design minimises visual impact.

The integral sliding door panels on the side load of R-Series models, reduce the operational space requirement and ensure easy access with options for locking systems. R-Series Lockers are available in two door or three door format.

An all-steel construction combines durability and style, with side panels, roof sections and sliding door frames manufactured from colour coated steel, formed as cladding cassettes and panel fixed internally for security. Integral fixing points within the unit base frame enable ground anchors to be installed hidden from view.

urbanspec steel panel cladding can be specified with hole pattern laser cut designs or graphic wraps that can help soften the built environment. Sedum green roof option on the R-Series product can be used to achieve Biodiversity Net Gain targets and create valuable pockets of biodiversity in the urban landscape.
