

CPD Seminar: In person or online

Achieving Biodiversity Net Gain with External Storage

This free CPD seminar will help you understand the science behind achieving Biodiversity Net Gain, why external storage presents the ideal platform for doing so, and the principles you need to follow to ensure that it is successful.

CPD Objectives:

- What is Biodiversity Net Gain and why is it important?
- What are the options for increasing BNG value on your projects?
- How is BNG measured and what does 'good' look like?
- Which building features deliver the highest Biodiversity Net Gain?
- Why you should consider incorporating BNG into external storage.
- What types of greenroof can you select for your external storage project?
- What are the structural and fire safety implications of a greenroof in external storage design?
- How to specify external storage units for long service life with minimal maintenance.
- Examples of external storage structures with integral greenroof design.

Run Time & Schedule

CPD presented in person with lunch included or online using Teams, Zoom or Skype.

Duration: 60 minutes with time allowed for questions and project advice.

Location

Your office with lunch provided.

January 2024 - Biodiversity Net Gain rules are due to come into effect
